# Reporting Category Information

This document provides a detailed list of categories and their data fields available within ProgressBook Reporting. Most ID fields are a GUID or a 32-character field that may look odd to the typical user. Please see the *Joining Categories PowerPoint* presentation for further information on joining categories and understanding GUIDs. Standard fields are fields available in every category when applicable.

If you feel there should be additional fields available in a category or if a new standard field is needed, please reach out to ProgressBook Support and they will enter an enhancement request for the Ad Hoc Reporting Committee to consider.
