Troubleshooting

Below are some common errors that you may encounter and their solutions.

Error: “The User Name/Password supplied is invalid, or your account may be locked or disabled.”

The error occurs when the entered login information is incorrect or the account in question is locked or disabled. First, verify that the entered login information is accurate. If the error persists, contact your school or district administrator to determine your account status and permissions.

Error: “Timeout error retrieving data. Please try again, or restart the app. If the problem persists, please contact support.”

The error occurs when there is a timeout calling back to the mobile API. Restarting the app typically solves this issue.

Error: “Your district has no schools configured for the current term.”

The error occurs after login and indicates that, for the current term, based on the current date, the district has not set up any buildings. This typically occurs only during the summer term. You can resolve this by choosing a different school year on the **Settings** screen of the MobileApp (see “[Adjusting Settings](#).”)

Error: “The App requires selecting a default School. In this MobileApp you can change this selection later on the Settings page. To avoid having to make this choice during logins, update your default school from the SIS application.”

You may see this error when logging in to the MobileApp. To update your default school, log in to the StudentInformation application (not MobileApp) and select the desired school from the drop-down list on the masthead. Then, click  to expand your account options and click **Save As Default School**.
